

Trading Cards

Name: Dave Darling

Title: Senior Systems Analyst

What I do: Communicate with principal researchers, write up descriptions for feedback.

Education: BA, Computer Science, Knox College, Galesburg, IL

Experience: Cockpit graphics programming directly out of college.

Skills: Creating out-the-window scenery for simulators, and programming mathematical models describing an aircraft's behavior.

Interests: Being a "gear head"; working on my cars and having one car that I race—on the occasions that it runs, at least.

You can get there from here, but sometimes it's easier just to make "here" look like "there".
